

# EveryonePrint

## Convenient mobile printing from your own cloud

To exploit the freedom and flexibility mobile devices offer in your business environment you need a convenient and secure mobile printing solution for any smartphone or tablet. That is precisely what EveryonePrint offers. Users can print documents from their mobile device to any ineo system – whenever they want and wherever they are.

## Fast, secure and versatile

EveryonePrint is a server-based, platform- and device-independent print solution that enables you to easily establish a private-hosted cloud-printing environment that offers users secure mobile and follow-me printing. Follow-me printing gives users the freedom to release their print job at any ineo device – with no need to specify a certain ineo printer in advance. EveryonePrint enables documents to be printed from any brand of smartphones or tablets. IT administrators will welcome the versatile functionality and comprehensive control the software offers.

Moreover, EveryonePrint can be configured for internal and external users, a feature that becomes particularly useful when customers or business partners are visiting your premises. The convenient and secure mobile printing function enables them to send a document either via email or via a web upload page.

## Broad range of functions

EveryonePrint offers flexibility in print job submission – by email, landing page, printer driver, AirPrint, Google Cloud Print or via the EveryonePrint app for iOS, Android and Windows devices. Moreover, basic job settings can be easily modified before a job is released for printing. EveryonePrint supports mobile printing of Word, Excel, PowerPoint and PDF documents, websites, TXT, JPG, etc. – Access can be limited to known users in your corporate network and authentication can also be granted to your guests. EveryonePrint can be easily connected to your existing print accounting system so all mobile print jobs can be tracked and allocated to specific users or user groups.

### Key benefits

- Increased efficiency through user-friendly and convenient printing from smartphones and tablets
- Lower costs and reduced paper and power consumption thanks to secure follow-me printing.
- Improved security since only authenticated users can access a printer
- Improved printing cost transparency through straightforward integration of EveryonePrint into your existing print accounting system

## SYSTEM REQUIREMENTS

### Hardware
